Fusion Shear

Professional, Electric 2-Speed Shearing Machine

Fusion has been expertly designed for challenging shearing situations and is able to cut through dense coats on sheep and cattle effortlessly. Fusion is light and has been ergonomically designed for comfort and ease of use, offering multiple grip positions and two speeds.

- 2 speeds; normal (2500RPM) and fast (2900RPM)
- Powerful & efficient 360W permanent-magnet motor
- Overload protection for the motor featuring an easy-reset function, so you can simply slide the on/off switch backwards to reset the internal fuse
- Specialised double-fan design to maximise air-flow to cool the motor and ventilation outlets to dissipate heat ensuring cool running even in heavy duty applications
- Fully serviceable motor, with replaceable brushes & bearings & rotor
- Industrial grade ball-bearings used through-out, for cooler running and longer service-life
- Thicker gear teeth and sealed gear-box, for increased durability
- Slim, ergonomic handle featuring 2 grip positions; a perfectly balanced middle grip ideal for crutching and detailing grip at the front end for finger-tip control during shearing

| Specification Type | Product |
|--------------------|--|
| Drive Unit | 360W Motor (Maximum) |
| Power Source | Mains |
| Dimensions | 340mm (L) x 52mm (D) |
| Weight | 1.3Kg (w/o cable) |
| Accessories | Grease for the gears, Cleaning brush, R30 Oil and Shearers screwdriver |
